UN-approved packaging for healthcare risk waste UN3291 and UN3249

Fully compliant and tested to perforation standard **EN ISO 23907-1:2019**

Pacazur®

PACKAGING FOR HEALTHCARE RISK WASTE

Manufactured in highly resistant impact polypropylene, the **Pacazur** are designed for the safe collection of **infectious (UN3291) and cytotoxic waste (UN3249)** including needles and sharps objects. They are **UN-approved for the Carriage of Dangerous Goods by Road** according to latest ADR version and tested to **EN ISO 23907-1:2019** (penetration, toppling, dropping, stability, closure devices etc...).

Documentation and certificates available from our quote and on www.plazur.fr

DESIGNED FOR USERS' SECURITY

Their use prevents contamination & preserves from punctures and musculoskeletal disorders.

- **Hinged lids with temporary closure positions on both versions (patented): plain lids and lids with aperture.**
No constraint for the permanent closure if the hinge is not inserted.
Possible closure between 2 uses in compliance with EN ISO 23907.
- **Effortlessly permanent closure without risk of compaction:**
11 closing points (clips), snapped with only 2 fingers.
- **Safe handling: 3 carrying handles** incl. 2 lateral handles and 1 front handgrip independent from the lid.
- **Leakproofness** thanks to the Hot-Melt joint.
- **Great stability:** large basis, foot print on the lid.
- **Traceability (barcode)** : containers identified by a unique number.
- **Personalisation:** colours, palletisation, autoclavable lids and markings (possibility to print a company logo) on request.
- **Handling accessories & stand** with foot pedal lid-opening system.
- **Ergonomic shape.** User-friendly design.
